

# Mouse IgG2a Fc Protein

Cat. No. IGG-MM02A

## Description

<b>Source</b>	Recombinant Mouse IgG2a Fc Protein is expressed from HEK293 without tag. It contains Glu98-Lys330.
<b>Accession</b>	P01863
<b>Molecular Weight</b>	The protein has a predicted MW of 26.38 kDa. Due to glycosylation, the protein migrates to 33-38 kDa based on Tris-Bis PAGE result.
<b>Endotoxin</b>	Less than 1EU per µg by the LAL method.
<b>Purity</b>	> 95% as determined by Tris-Bis PAGE > 95% as determined by HPLC

## Formulation and Storage

<b>Formulation</b>	Lyophilized from 0.22µm filtered solution in PBS (pH 7.4). Normally 8% trehalose is added as protectant before lyophilization.
<b>Reconstitution</b>	Centrifuge the tube before opening. Reconstituting to a concentration more than 100 µg/ml is recommended. Dissolve the lyophilized protein in distilled water.
<b>Storage</b>	-20 to -80°C for 12 months as supplied from date of receipt. -20 to -80°C for 3-6 months in unopened state after reconstitution. 2-8°C for 2-7 days after reconstitution. Recommend to aliquot the protein into smaller quantities for optimal storage. Please minimize freeze-thaw cycles.

## Background

Mouse IgG2a is one of the subtypes of murine immunoglobulin IgG which mediates immune responses to carbohydrate or polysaccharide antigens. The Fc region of IgG2a can bind to FcRn to prolong its half-life.

## Assay Data

### Tris-Bis PAGE

Mouse IgG2a Fc on Tris-Bis PAGE under reduced condition. The purity is greater than 95%.

### SEC-HPLC

The purity of Mouse IgG2a Fc is greater than 95% as determined by SEC-HPLC.

# Mouse IgG2a Fc Protein

Cat. No. IGG-MM02A

## Assay Data

### SPR Data

Mouse FcRn, His Tag captured on CM5 Chip via Anti-His Antibody can bind Mouse IgG2a Fc, No Tag with an affinity constant of 2.72 nM as determined in SPR assay (Biacore T200).
